ABOUT ME

Dedicated professional with over 6 years of experience in PHP development, specializing in Laravel, React JS, and MySQL including debugging, testing, and deployment. Skilled in providing technical leadership, offering innovative solutions, and collaborating effectively with my teams to achieve goals to deliver high-quality, scalable applications that align with business objectives.

WORK EXPERIENCE

Laravel Developer

Mar 2024 - Jun 2024

Medcare General Trading Company | Khaitan, Kuwait

Project: Medical supply management ERP system

Technology: HTML, CSS, Bootstrap, Laravel, Ajax, MySQL, and Git

- Developed and contributed a comprehensive medical product supply management system integrating an ERP application.
- The system was designed to handle the import and distribution of pharmaceutical products to local medical stores, enhancing overall efficiency and compliance with industry standards.
- Streamlined key operations include inquiries, quotations, products, manufacturer registration, purchase orders, and sales transactions.
- Allowed multiple user roles with different access levels, ensuring secure data handling and operational control.

Freelance Consultant

Dec 2023 - Jan 2024

Mubaader Services | Kuwait City, Kuwait

Project: Event Management System integrated with payment gateway

Technology: HTML, CSS, Bootstrap, Jquery, Ajax, PHP, MySQL, and Git

- Developed a CMS-based event management system for booking events with customizable features like private tables and guest addons.
- Integrated an event package and calendar allow users to choose time slots and select event types to complete their booking orders.
- Implemented additional requests, promo coupons, and an integrated MyFatoorah payment gateway for seamless transactions.

Full Stack PHP Developer

Feb 2018 - Nov 2023

Tabakh Al Freej company | Hawally, Kuwait

Project: Online food order and delivery management with an ERP system, point of sale (POS), and e-commerce applications.

Technology: HTML, CSS, Bootstrap, Jquery, Ajax, PHP, Laravel, and MySQL

- Developed and deployed a web-based online food ordering system, integrating point-of-sale for multiple outlets, aligned with company specifications.
- Additionally, I developed an e-commerce application and optimized it for web view concepts on both Android and iOS mobile applications using Flutter and Xcode.
- Contributed to reporting features by generating detailed reports for sales to provide key insights for business operations and decision-making across all branches.
- Enhanced payment processing by integrating the KNET payment gateway into the e-commerce application while efficiently managing merchant login for enhanced security and accessibility.
- Utilized Git for version control and collaboration in projects, ensuring efficient code management and seamless integration of features.
- Managed cloud server hosting with several domains, multiple databases, DNS records, GIT repositories, and email configuration.
